

WIPES CLOG PIPES!

Because wipes don't break down like toilet paper, they can:

clog the homeowner's pipes and municipal sewer lines

cause sewer back-ups and expensive plumbing bills for the homeowner or business owner

lead to increased fees from your wastewater provider

How can you help?

Place these items in the trash

Although many brands of disposable wipes are labeled "flushable," don't flush them!

Do your part and keep wipes out of the pipes!
